Vivek Kumar

Full-Stack Developer

vivek@example.com · github.com/vivek-kumar · linkedin.com/in/vivek-kumar

Full-stack developer focused on practical web applications: React interfaces, Django REST APIs, PostgreSQL data models and Playwright checks for critical user flows. Comfortable working across the stack and documenting decisions as the system evolves.

Skills

HTML5 · CSS3 · JavaScript · React · Python · Django · REST APIs · PostgreSQL · SQL · Playwright · Manual testing · API testing · Git · GitHub · Postman

Selected projects

PulseOps — DevOps Monitoring Dashboard

In development

React · Django · PostgreSQL · Playwright

A dashboard concept for service health, deployments and incident context. Working on the domain model and read API; monitoring integrations are not implemented yet.

Office Management System

In development

React · Django REST Framework · PostgreSQL

An internal-operations project modelling employees, attendance, tasks and records with explicit relationships and constrained state transitions.

CyberArena — Cybersecurity Training Lab

Planned

Python · Django · PostgreSQL · Playwright

A planned defensive-security practice environment. The data model and scenario structure are defined; implementation has not started.

Experience & learning

Independent Projects — Full-Stack Developer

Self-directed · Ongoing

- Build responsive React interfaces and Django REST endpoints backed by PostgreSQL.
- Test core flows with Playwright and validate API behaviour in Postman.
- Use Git and GitHub for version control and project documentation.

Testing Practice — QA & API Testing

Self-directed · Ongoing

- Write end-to-end scenarios for critical flows and check failure paths.
- Run exploratory desktop and mobile passes across in-progress applications.

Placeholder resume generated from the portfolio content on 19 October 2026. Contact details and profile URLs are placeholders, and professional employment history has not been supplied. Replace this document with a real resume before publishing.
